

Actions the tech industry should be doing to address environmental sustainability

							99% feel the tech industry could do more compared with 96% in 2020.	
2022	53%	53%	52%	45%	38%	32%	31%	
							1%	
							4%	
2020	52%	51%	61%	49%	43%	39%	33%	
	Demanding more accountability in the supply chain	Working towards becoming fully carbon neutral by 2030	Investing more in energy efficient technologies	Self-imposed sustainability targets	Board room representative for sustainability issues	Broadening licence-free access to environmentally friendly Intellectual Property	Closer cooperation with NGOs to help achieve socially desirable sustainability	The Tech Industry is already doing enough to address these concerns

Almost all companies feel the tech industry should do more to address environmental sustainability concerns, with a slight increase vs 2020. As in 2020, key actions include supply chain accountability and working towards becoming carbon neutral. However, some areas of action are less likely to be identified, including investing more in energy efficient technologies.
